DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, the claims appear to be very narrative in content and as such the exact metes and bounds of the claims cannot be fully ascertained.

Appropriate correction is required

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5 and 9-11 rejected under 35 U.S.C. 102(b) as being anticipated by PCT WO 00/36299. '299 discloses a wind turbine comprising: a support structure 1 having a first end 6 and a second end 4, said support structure being pivotally mounted, between the first end and the second end, to a column 2, the column having a substantially vertical axis; a counter-weight 7 located adjacent the first end of said support structure; and a rotor head attached adjacent the second end of said support structure, said rotor head having a rotor with a center of gravity located on the substantially vertical axis of the column so as to reduce gyroscopic effects. The

rotor comprises a self-stabilizing two bladed rotor 5 and is configured as a dihedral and the application point of the axial thrust is situated behind a rotation axis of the column.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over PCT WO 00/36299 in view of Belden (5,295,793). PCT '299 discloses all of the claimed subject matter except for the rotor head being tiltably attached to the second end of the support structure.

Belden teaches a wind turbine having a rotor head that is tiltably attached to the second end of a support structure 28 to allow it to respond to changes in the wind. Since both PCT '299 and Belden disclose wind turbine that are responsive to wind conditions it would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the rotor head of PCT '299, with the teachings of Belden, by tiltably attaching the rotor head to the support structure for the purpose of all the rotor to more easily respond to changing wind conditions.

CONCLUSION

Allowable Subject Matter

Claims 1-4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 7, 8 and 12-19 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
